

THE DEMOCRAT

W. J. ROUSE, Editor

TERMS \$1.00 PER YEAR

Entered at the Postoffice at Monroe City Missouri, as second-class matter.

THURSDAY, MARCH 25, 1915

ANNOUNCEMENTS

The Democrat is authorized to announce for County Superintendent of Schools of Monroe county, subject to the will of the voters, Tuesday, April 6th, 1915.

JOHN L. CARTER.

LEE D. ASH.

The Boosters are doing things

Make the street in front of your property better.

Be found doing something for the good of your community

More labor employing institutions in Monroe City mean more prosperity. We can get them.

Get busy and do something to advance the interests of Monroe City. Don't hold back or knock.

Do you want to see Monroe City a better town in every respect? Then get into the band wagon with the Boosters and help push.

Monroe City is forging to the front. The proper development of the natural resources which lie at our door will mean a city of 10,000 by 1920

The rock crushing plant, hauling and placing rock on the streets will give work to many people. We need more labor employing institutions here. Harness Salt River and we will get them.

Building & Loan Associations mean that more people will own their homes and the more people who own their homes the better will be our citizenship. Then, work for a Building & Loan Association in Monroe City.

Monroe City is surrounded by as fine and fertile farming land as the crow ever flew over. Then there are other great natural resources lying undeveloped right at our door. They should be developed. They will be developed some day. Why not now?

Miss Myrtle Threlkeld was here Saturday enroute to her home at Shelby. She closed a very successful term of school near Indian Creek last week.

KILL THOSE LICE AND MITES

That worry your poultry and continually make them unprofitable. As long as your poultry are bothered with lice and mites, the cost of keeping them is greatly increased, because those pests sap the strength and vitality of the fowl and make them unfit for laying.

It is impossible by the old method of painting, spraying and dusting to destroy the millions of these little pests that inhabit the little cracks and crevices in the poultry house and continually swarm over the skin, tormenting, abusing and hindering them from being profitable to you.

Science Wins Again

Science displaced the candle with the incandescent lamp, the ox-cart with steam and electricity, made two ears of corn grow where one grew before. Now science has scored a great victory for poultry raisers. It has produced

LICECIL

The only insect exterminator that destroys all Lice and Mites without painting, spraying or dusting.

What it is

LICECIL is compounded by scientifically blending the most powerful insect exterminators known to science. Any one of its ingredients will quickly kill Lice, Mites, etc., but when all combined to produce LICECIL they become so powerful that they kill vermin, such as Lice, Mites, Fleas, Bed Bugs, etc., quickly, without injuring the most delicate chick. Some of the powerful ingredients of which LICECIL is composed evaporate and form vapors which are three times heavier than the air and descend in a misty form, penetrating feathers, cracks and crevices everywhere. As Lice, Mites, Fleas, etc., have no lungs, but breathe through the pores of their bodies, they are quickly destroyed by LICECIL vapors.

How to Use

Simply put a teaspoonful of LICECIL in each nest and hang the balance of the uncorked bottle over the roosts.

Used by Best Poultry Raisers
All progressive poultry raisers use LICECIL, because it saves time, labor and money; because it eliminates the disagreeable work of painting, spraying and dusting; because it is easy, safe and convenient to use, and produces results immediately.

Take a bottle of Licecil home with you today and make your poultry profitable.

Guaranteed to do the Work or no Pay. For Sale Only by
